3 D C R Y S T A L

AUGUST 2019
CORPORATE
EDITION

Awards and trophies are the physical demonstration of an emotion or sentiment. They may be presented to reward achievement, to express thanks, to commemorate an event, and also to promote a brand. Whatever the reason, the emotion elicited by the award or trophy correlates directly with the perceived value of that item.

Optical crystal awards, trophies and promotional gifts are highly valued due to their superior quality, perfect clarity and significant weight. As optical crystal is essentially lead-free it is very hard and so can be hand cut and polished, producing brilliant edges and wonderful smooth surfaces. The crystal can also be subsurface engraved with 3-dimensional designs, imparting significant “Wow” factor and adding further to the value of the item.

Introduction to Internal Engraving

"An internally engraved award is the only solution that allows a full 3D design to be viewed from all angles within an award."

Our premium method of decoration - Unlike traditional decoration methods that leave a mark on the surface, we use state-of-the-art laser technology to engrave internally within our optical crystal awards, leaving the surface untouched. Every 3D design is made up of many thousands of tiny lasered-etched points within the crystal.

The ultimate engraving solution - Create prestigious presentation pieces; your logos and 3D designs appear to float inside the award.

Precise detail - Internal laser engraving provides the highest resolution and clarity for photo engraving.

The "Wow" factor - Take your awards to the next level and leave the recipient in awe. When you want your award to stand out from the rest and show your ultimate appreciation, talk to us about incorporating internal laser engraving into your next award.

Logos & Text

3D Models

3D Portraits

Other Decoration Options

- **Advanced Colour Print** is a unique method of adhering full colour images onto the surface of optical crystal & acrylic awards and trophies. Cover the complete surface of the crystal, or merely add a colour logo or image to a particular area. Choose from a translucent image, or by adding a white backing the colour image becomes opaque.

- **Deep Surface Etching** is created when the crystal is blasted with a highly pressurised stream of fine sand. Logos and text are commonly carved into the surface of the crystal. The result has a similar appearance to internal engraving and is the preferred option in certain situations.

3D CRYSTAL

CORE RANGE

Our 3D Crystal collection features the finest crystal awards and trophies, perfect for internal engraving. Customised 3D designs, logos and images are reproduced inside pristine optical crystal one point at a time using state-of-the-art laser technology. With design options only limited by your imagination, these unique awards have incredible “Wow” factor and are guaranteed to demand attention.

ADVANCED COLOUR PRINT

Need Colour?

The Advanced Colour Printing method allows us to add vibrant colour to our crystal awards and trophies. Include a colour logo, or perhaps a full colour image. Colour print as an alternative to engraving, or combine both decoration methods to create an amazing award.

PRINT ON CUSTOM CRYSTAL AND ACRYLIC AWARDS

CUSTOM AWARDS & TROPHIES

In addition to our core range of crystal shapes & sizes, we can also create customise crystal awards. The level of customisation can be tailored to the customer's requirements:

- A) Select from a wider range of made-to-order crystal shapes & sizes,
- B) Add coloured crystal features to an award,
- C) Design your own completely unique award with the assistance of our artisans.

A) CUSTOM AWARDS - MADE-TO-ORDER

While our core range of crystal shapes covers most bases, our made-to-order range expands the variety of awards on offer. As the crystals are custom-made, the size of the award can be tailored to the customer’s requirements.

C) CUSTOM AWARDS - DESIGN YOUR OWN

Can't find the perfect award?

Creating a one of a kind award is uncomplicated with the help of our experienced designers. Choose between crystal or acrylic, and combine custom shapes, colours & different decoration methods to create an award that is uniquely you. We simplify the process from concept to completion.

Step 1: Concept

Discuss your ideas and requirements with us.

Step 2: Digital Proof

Our design team will provide you with digital proofs of your award concept for approval. We will fine-tune the design until you are 100% happy.

Step 3: Sample & Production

Once you are happy with the proof we can supply you with a pre-production sample⁺. When you provide final approval we will proceed with full production.

^{*} Price is dependant on crystal size, order quantity, level of customisation and required time-frame (note, lead-times are generally longer than for stock items).

⁺ Samples are subject to charge. Sample pricing will be quoted prior to the manufacture of the sample.

EXAMPLES OF CUSTOM AWARDS

EMBEDMENTS

Do you have an object that you would like to suspend inside an award? The good news is that almost any item can be embedded within clear resin to produce incredible awards, paper weights, financial tombstones etc.

PLAQUES & SHIELDS

What better way to recognise achievement or commemorate an occasion than with a traditional plaque. Shields make excellent perpetual trophies, while honour boards can be hung prominently to celebrate success for years to come.
